

Use case

Device Subscription Service

Scaling your device fleet to match organizational needs

How can your organization stay nimble in the face of fluctuating technological demands? The answer lies in embracing digital agility. For companies juggling diverse work models and variable users, this agility is essential for boosting output and sparking fresh ideas. Unisys Device Subscription Service (DSS) empowers you to do just that — enhance flexibility, optimize resources and deliver consistent device experiences across the entire workforce. With Unisys DSS, you can easily resize your tech setup to fit evolving requirements, keeping you a step ahead as conditions change.

Scenario

Organization size and scope:

All sizes, industries and geographies managing diverse device fleets

Objective:

Scale device fleets while ensuring equitable and consistent access for all users

Organizations with a diverse user base like yours face a dual need related to device management: scalability and digital equity. As user numbers fluctuate and needs shift, the complexity of maintaining an efficient device ecosystem grows. You may grapple with inefficient scaling practices and limited access points, hindering your path to operational excellence.

Yet despite these hindrances, there are ample opportunities to innovate and bolster employee support through smarter device management. With Unisys Device Subscription Service, you can scale your device fleet seamlessly while maintaining uniform access and performance.

How Unisys delivers value

Unisys Device Subscription Service offers a comprehensive approach to scalable and accessible device management.

- **Flexible device allocation:** Dynamic adjustment of device fleet size accommodates changing user numbers and organizational needs.
- **Persona-driven forecasting:** Advanced analytics anticipate device needs based on user roles and preferences.
- **Diverse device options:** A curated, evergreen device catalog meets various user requirements.
- **Convenient access points:** Smart lockers, tech cafés and vending solutions offer round-the-clock device pickup, return and support across multiple locations.
- **Streamlined device recovery:** Efficient processes for device return, redeployment and environmentally conscious disposal.

ROI potential

Implementing Unisys Device Subscription Service can reshape device management, boosting scalability, accessibility and inclusivity:

- Operational agility rises through swift device fleet adjustments in response to changing needs.
- User satisfaction enhances due to convenient, always-available access to devices via smart lockers and kiosks.
- Productivity increases as telemetry data ensures timely device refreshes and minimizes downtime.
- Resource utilization optimizes through efficient recovery and reuse processes.
- Expense management improves with a flexible subscription model that aligns costs with device usage.

These outcomes enhance day-to-day operations and position your organization as a technology leader that is committed to accessibility and inclusivity.
