

144 The 2020 Unisys Security Index for the UK is 144 out of 300 points, matching the lowest point surveyed since 2017.

UNISYS SECURITY INDEX TRENDS VS. 2019

PERSONAL SECURITY:
+6%

FINANCIAL SECURITY:
-7%

NATIONAL SECURITY:
+9%

INTERNET SECURITY:
-14%

61%

of Brits were concerned about the stability of their country's health infrastructure during a pandemic, while only 41% were worried about their own physical health.

Natural disasters jumped from the lowest ranked security concern in 2019 to the highest in 2020.

Brits were less worried about online threats such as viruses and hacking; levels dropped from 41% in 2019, to 31% in 2020.

78%

of over 55s claim to be just as careful when securing their personal and financial details on their smart phones as they are on other devices.
